

the future of drive technology

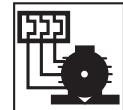

Delta's C2000 range comprises the most cost-effective FOC (field-oriented control) AC motor drives with built-in PLC function.

The series offers high efficiency and performance
with low maintenance costs.

- enhanced motor efficiency and improved load impact
- safe stop function
- innovative PID technology
- wide range of models to fit different industries and applications
- built-in high-speed communication CANopen protocols and MODBUS
- enhanced protection and adaptation to ambient conditions
- modular design for easy maintenance
- optional high-speed communication interface cards available

see page 110 of this
catalogue for details

Delta AC motor drives incorporate superior microprocessor digital control, with high frequency pulse width modulation for smooth motor operation. An extensive array of software control functions, combined with hardware options, provide total solutions for motor automation and control.

Sensorless vector, flux vector and other technologies are employed in a broad range of products, all offer in high torque, smooth operation with low harmonic distortion.

AC motor drives

new

C2000 series drives utilise FOC (field-oriented control) as the core technology to fulfil demands for high starting torque, accurate speed and torque control. Suitable for many applications, they offer PID adjustment, simple operation interface, flexible I/O extensions, fieldbus modules, wide power range, complete protection, adaption to harsh temperature conditions, long-life design, compliance with global safety standards (CE/UL/cUL), easy maintenance, low malfunction rate and self diagnostics.

C2000 series high-performance FOC AC motor drive

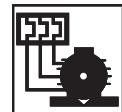

- speed/torque/position control mode, dual rating design (normal/heavy duty)
- improved sensorless vector control (SVC) response and torque control for crane applications
- outstanding 4-quadrant torque control/limit
- intelligent PLC function (10k steps, 19 points: 10DI/4DO - 3AI/2AO)
- synchronous position control
- enhanced protection and environmental adaptability design
- modular design for ease of maintenance with many expansion extensions
- high-speed communication interface with built-in CANopen and MODBUS
- control modes: VF, SVC, VF+PG,FOC+PG, TQC+PG, FOC sensorless, FOC+PM+PG
- torque ability: up to 150% at 0.5Hz, FOR FOC+PG up to 150% at 0Hz

To achieve greater energy savings, Delta introduces the sensorless vector-control CP2000 drive for pump and fan applications and HVAC systems. Designed specifically for related applications with an intelligent PID controller.

Functions such as sensorless vector control, multi-segment V/F control curve and soft start greatly improve the efficiency of the fluctuating torque load and constant output load.

Programmable logic controllers (PLCs)

Delta high-performance, high-speed DVP series PLCs are most efficient and incorporate communication capabilities. Advantages include numerous built-in convenient commands for easy operation access and communication function monitoring.

The module-type unit affords tremendous space-saving, allowing simple, clip-on expansion possibilities. The PLCs high performance and extensive I/O units represent a high-value solution for machine control and industrial automation.

Common characteristics

- compact dimensions (H) 90 mm x (D) 60 mm DIN-rail mounting
- built-in high speed counters 20-200 kHz (model dependant)
- clip-on extension modules – general (right side), high-speed (left side) (model dependant)
- plug-in terminals for ease of wiring and maintenance
- dual communication ports RS-232 and RS-485 MODBUS ASCII/RTU
- program language: (IL) instruction list, (LD) ladder diagram, (SFC) sequential function chart.
- 24 Vdc supply

Programmable logic controllers (PLCs)

DVP16ES

ES2 series PLCs are compact highly efficient, functional instruments with incorporated communication capabilities. Advantages such as built-in convenient commands offer easy access to operation and communication function monitoring.

- MPU I/O points: 16, 20, 24, 32, 40, 60 points
- expandable (with plug-in extension modules) up to max. 256 points
- program capacity: 16k steps / execution speed: 0.54µs
- data register: 10k words
- three built-in COM ports – 1x RS-232 and 2x RS-485 ports, Modbus ASCII/RTU protocol compatible (can be master or slave)
- eight built-in high-speed input points (2 for 100 kHz, 6 for 10 kHz)
- supports UFO, UID Dir, CW/CCW, AIB, counting modes
- four built-in high-speed pulse output points (2 for 100 kHz, 2 for 10 kHz);
- supports pulse, pulse DIR, AIB, CW/CCW modes
- emerging industry application: exclusive instruction and function blocks for PV solar tracking
- handy frequency inverter instructions for controlling Delta motor drives
- compact: (H) 110 x (D) 78 x (W) 16:105 / 24:125 / 32:145 / 40:165 / 60:225 (mm)

DVP32ES

ES2 series standard MPU 100-240V AC

- MPU I/O 14,20,24,32,40,60 points (extendable to 256 points)
- cost effective / plug-in termination
- DIN rail mounting or chassis mount

Screen Editor

DOP series HMI (human machine interface) touch screens

Delta DOP series Human Machine Interface provides various touch screens with multiple dimensions and colours and offers fast, convenient control functions for industrial automation machines. Moreover, programming the whole DOP series is done with Delta's Windows-based, user-friendly Screen Editor software. With this software, the user can quickly edit images and graphs and set suitable communication protocols through Macro commands.

type	display size	keys	colour	description	price
DOP-AS Series (economic version) touch screen					
• 32-bit RISC micro controller • 320 x 240 pixels • 4 x user defined function keys, 1 x system key • 2MB flash ROM - 128KB backup memory • 3 sets COM ports RS-232/422/485 for multiple communication protocols	3.5"	320x240 pixel 2MB ROM	panel cutout: 118.8 x 92.8		
DOP-B series high-quality full-colour touch screens					
• full 65 536 colour high quality TFT display, enhanced resolution for more realistic images and colourful, vivid display • RS-232/485/422, USB disk, Ethernet, audio output, SD card are supported for various applications • high Flash and SDRAM memory • multimedia stereo sound effect output (certain models) • supports CF memory card - Ethernet (certain models) • cost effective	4.7"	480x272 pixel 2MB ROM	panel cutout: 138 x 93.1		
DOP-B04S211	4.7" (103.7 x 58.8)	–	65536 colours	–	HMI touch panel 3050.00
5.6"	320x234 pixel 8MB ROM	panel cutout: 172.4 x 132.4

AC servo drives and motors

ASDA-A2 servo drives "high precision" servo drive for total control

- excellent performance (up to 1kHz frequency response)
- flexible position register control mode (PR mode)
- feature 20-bit superior resolution encoder (1.280.000 pulses/revolution)
- full closed-loop control (capable of reading second feedback)
- superlative vibration suppression for a wide variety of applications

type	rated output power	supply	description	price
ASDA20421M	400 W	220V single-phase	A2 (20-bit) servo drive	5250.00

ES series incremental encoders

ROE series encoders, provide precise positioning and speed sensing functions. They convert rotary motion or position data to electronic pulses for speed and position detection.

common characteristics:

- signal output **N**: A, B & Z (Ungated)
- encoder diameter **5**: 50 mm diameter (other sizes available on request)
- shaft diameter **6**: 6 mm diameter (other sizes available on request)
- resolution **0C**: 360 ppr / **06**: 600 ppr / **11**: 1024 ppr (others available on request)

type	resolution (ppr)	input voltage	output form	description	price
• output form C : open collector					
• input voltage 9 : 7 - 24 Vdc					
ES502CN6942	200 ppr	7 - 24 Vdc	open collector	incremental encoder	940.00
ES50CCN6942	360 ppr	7 - 24 Vdc	open collector	incremental encoder	940.00

DPA compact miniature pressure/vacuum sensors (H) 30 x (W) 30 x (D) 26 mm

- 2 x digital outputs (NPN or PNP) and 1 x analogue output (1-5V or 4-20mA)
- various unit conversion functions (kPa, kgf/cm², bar, mmHg, psi, inchHg)
- selectable LED (3 colours) set different colour for different parameter
- 10 sets of output response times available
- connection: 1/8PT inner pore M5
- safety control function (to prevent unwanted parameter changes)

type	pressure range (kPa)	output type	description	price
DPA01MP	-100-100 kpa	NPN + 1-5 Vdc	DPA mini pressure sensor	830.00

DTB4896RRE*	48 x 96	event input with 2 set points	relay	relay	1090.00

* Event function permits switching between 2 different temperature set points
any combination of above outputs available on request

DTC modular temperature controller 24 Vdc (thermocouples see page 224)

DTC features modular, wire-saving structure able to monitor many temperature points by parallel modular extensions. User configurable outputs according to actual requirements.

- PID, programmable PID, ON/OFF, manual control
- PID control function permits set-up of up to 64 sets of temperature and control times
- adopts dual-loop output control (able to execute heating and cooling simultaneously)
- analogue inputs: 0-5V, 0-10V, 0-20mA, 4-20mA, 0-50mV
- built-in RS-485 communication interface (MODBUS ASCII/RTU (2.400 - 38.400bps)

DTC1000R	25.2 x 90	main unit temp controller	relay	relay	670.00
DTC1000C	25.2 x 90	main unit temp controller	4-20mA	relay	670.00
DTC2000R	25.2 x 90	extension unit temp controller	relay	relay	670.00
DTC2000C	25.2 x 90	extension unit temp controller	4-20mA	relay	670.00

Power supplies

Delta power supplies offer a nominal output voltage of 24 Vdc with a wide temperature range - 20°C to + 75°C and a minimum of 20ms hold-up time. The state-of-the-art design is manufactured to withstand harsh industrial environments. The rugged ultra-compact housing is shock and vibration resistant to IEC60068-2, and provides overvoltage overload and thermal protection.

Certification: UL508, EN60950, cULus 60950, EN50178, EN60204, GS, CCS Aus

Features:

- ease of wiring and handling
- wide input voltage range 85 to 264 Vac (1 phase) - 320 to 575 Vac (3 phase)
- overload, overvoltage and thermal protection
- power boost 150% for 3 seconds
- expected lifetime: 10 years
- RoHS compliant

CTA timer / counter / tachometer (in one unit)

CTA 3-in-1 timer/counter/tachometer is able to receive external input signals and calculate the times of events, frequency and speed. The CTA unit can be applied to batch counting, total counting, length measurement, position control, accurate timing, rotating speed etc.

- panel size : 48 x 48mm
- power input : 100-240 Vac, 50/60 Hz <10 VA (available with 24 Vdc supply)
- power supply : 12 Vdc ± 10%; 100 mA (integrated)
- display : 6 digit LCD, 2 line - SV (set value): green - PV (current value): red LED
- input : PNP voltage or NPN non-voltage
- output : relay 1: SPST 5A/250 Vac - relay 2: SPDT 5 A/250 Vac / transistor (model dependant)
- easy DIP switch setup

Timer - timing up or down - 0.01 sec - 999.999 hours on-delay, interval, repeat (power on, pulse on, pulse off)

Counter - counting up or down 1 or 2 stage, batch-total-dual counting (speed selection 1/30/200/3k/5k/10k Cps)

Tachometer - measurement in Hz (can be configured to read RPM)

type	supply	description			price
